

SeaBoost Cream supplies nutrients needed by the skin.

Easy to Use

- Apply a tiny amount of SeaBoost Cream to the skin and spread it around. A little goes a long way.
- Be cautious about applying it to broken skin. However, some have noted how quickly broken skin can heal if they can tolerate the stinging sensation.
- Do not stir or disturb SeaBoost Cream. Just skim a small amount off of the top. When stirred, a fluid will separate from the cream.

The ocean is [a rich source of trace minerals](#). SeaBoost Cream nourishes the skin, helping your skin to heal itself.

SeaBoost Cream comes in a Miron glass jar, which enhances the energy and helps to preserve the cream much longer.

It is suggested that you re-use this amazing jar, to energize anything it holds!

SeaBoost Cream™

For Healthier Skin!

Nourish your skin with low sodium sea minerals, olive oil, coconut oil, argon oil, macadamia oil, jojoba oil, avocado oil, beeswax, sea collagen, supa yew, papaya, sheep sorrel, coleus amboinicus, stinging nettle, pacific yew and nasturtium.

All-Natural Product

SeaBoost Cream is an all-natural skin care product, containing no artificial colors or fragrances. It is helpful for many skin conditions.

To use, apply a small amount to the affected area and rub gently. Best applied daily, or morning and night.

SeaBoost Cream doesn't contain any perfumes and has a natural, musty aroma.

There are numerous ways SeaBoost Cream can help.

Uses

Athletes Foot – SeaBoost Cream can sting if applied to broken skin, but it does help skin to quickly heal itself.

Psoriasis – Apply a light film and work in a bit. Apply at least once a day, especially after bathing.

SeaBoost Cream can help to moisturize and nourish psoriasis skin for less itching and flaking.

Moles – One customer noted that when they put a bit on a round bandage each day and put over a mole, that after two months the mole dried up and fell off. This does not work for every type of mole.

Other Uses

Sunburns – The nutrients in SeaBoost Cream can help sunburned skin to heal itself.

Wrinkles – One customer has reported that SeaBoost Cream works better than the many face creams she has tried. Do not get it in your eyes.

Itching skin – Some people love how SeaBoost Cream nourishes the skin to help stop it from itching.

Other skin conditions – You can do your own experimenting to see where SeaBoost Cream works best.

Eczema – SeaBoost Cream is not generally recommended for Eczema or any other condition where the aim is to dry out a weeping condition.
